PROFESSIONAL SUMMARY

AI Engineer with 1.5+ years of experience building production-grade Artificial Intelligence (AI) systems — including Large Language Model (LLM) pipelines, intelligent document processing, and Retrieval-Augmented Generation (RAG) pipelines for context-aware retrieval. At UNIPREP, developed a resume parsing system processing 500+ documents with >90% field extraction accuracy. Proficient in Python, LangChain, FastAPI, and OpenAI APIs, with hands-on experience in prompt engineering, vector search, Natural Language Processing (NLP), Optical Character Recognition (OCR), Machine Learning (ML), and workflow automation. Adept at translating business problems into scalable AI solutions.

CORE SKILLS & KEYWORDS

AI / GenAI: Large Language Models (LLMs), Prompt Engineering, Retrieval-Augmented Generation (RAG), Natural Language Processing (NLP), Embeddings, Semantic Search, Optical Character Recognition (OCR), Document Intelligence, LangChain, Hugging Face, OpenAI API

ML / Data: Machine Learning (ML), Scikit-learn, Pandas, NumPy, PyTorch, TensorFlow, Exploratory Data Analysis (EDA), Feature Engineering, Anomaly Detection, Predictive Modeling

Backend / Engineering: Python, FastAPI, REST APIs, Microservices, Workflow Automation, SQL, Git

Vector Databases: FAISS, Chroma

Cloud: AWS, Azure, IBM Cloud

Other Tools: Streamlit, LangSmith, OAuth

WORK EXPERIENCE

AI Engineer | UNIPREP (Remote) | *Dec 2025 – June 2026*

- Built an end-to-end CV parsing system using Optical Character Recognition (OCR), Natural Language Processing (NLP), and Large Language Models (LLMs), achieving >90% structured field extraction accuracy across 5000+ resumes processed.
- Engineered RAG pipelines with LangChain, OpenAI APIs, FAISS, and Chroma for context-aware document retrieval, reducing manual review time by ~40%.
- Implemented prompt engineering strategies (chain-of-thought, few-shot) to improve extraction consistency, reducing hallucination-driven errors by ~25%.
- Developed FastAPI microservices and Python-based email automation workflows, cutting communication overhead by 30%.
- Integrated semantic embedding models for candidate-to-job semantic matching, improving shortlist relevance scores by ~35% and reducing recruiter screening time.

Executive – Product Design (AI/Data Focus) | EON Elevators Pvt. Ltd., Bangalore | *Nov 2024 – Nov 2025*

- Applied Python-based data analysis (Pandas, NumPy) and ML techniques to elevator fault datasets, supporting an estimated 15–20% reduction in unplanned downtime.
- Conducted EDA and feature engineering across 3+ years of operational datasets to surface failure pattern insights for the engineering team.
- Automated CAD design workflows using Python, reducing design turnaround time by ~25%.
- Recognized as Best Performer of the Month (Aug 2025) for cross-functional impact and initiative.

ML Intern | Aqmenz Automation Pvt. Ltd., Bangalore | *Oct 2023 – Nov 2023*

- Built a Python-based GUI application (Tkinter) for real-time data visualization, cutting internal reporting turnaround time by ~20%.
- Performed data preprocessing, EDA, and model evaluation across 5+ supervised classification models using Scikit-learn.

EDUCATION & CERTIFICATIONS

B.E. – Electrical & Electronics Engineering
Sapthagiri College of Engineering, Bangalore | 2021 – 2025 | CGPA: 8.20

Professional Certificate – Generative AI & Machine Learning
Indian Institute of Technology (IIT) Guwahati

Neurastack AI Developer Professional Certificate Course
Python Academy Inc. | Issued Aug 2026

Additional Certifications:

- Deep Learning with TensorFlow – IBM
- Python 101 for Data Science – IBM
- GenAI-Powered Data Analytics Job Simulation – Tata Technologies

PROJECTS

AI-Powered Resume Parsing & Automation System | *Python, LangChain, OpenAI, FastAPI, FAISS, Chroma, OCR*

- Designed a document intelligence pipeline extracting 15+ structured fields (skills, experience, education, contact details) from unstructured resumes across multiple formats (PDF, DOCX, scanned images) with >90% accuracy; deployed via FastAPI.
- Built an OCR pre-processing layer to normalize scanned and image-based resumes before extraction, reducing malformed-input failures by ~15%.
- Implemented hybrid retrieval (keyword + semantic) using FAISS and Chroma, enabling context-aware candidate search across a 10K+ profile corpus.
- Applied chain-of-thought and few-shot prompting to improve field-extraction consistency, cutting hallucination rates by ~25% on ambiguous resume layouts.
- Built candidate-to-job semantic matching using embedding models, improving shortlist relevance for recruiters by ~35%.
- Automated end-to-end profile generation and email dispatch workflows, reducing manual candidate screening effort by ~40%.
- Exposed the pipeline as modular FastAPI microservices, enabling independent scaling of parsing, retrieval, and matching components.

Predictive Maintenance System – Elevator Fault Detection | *Python, Pandas, NumPy, Scikit-learn, EDA*

- Analyzed multi-year elevator operational logs across multiple sites to identify recurring fault signatures, achieving 82% classification accuracy on anomaly detection.
- Performed extensive EDA and feature engineering (sensor readings, usage cycles, maintenance history) to surface leading indicators of failure.
- Built and compared 5+ Scikit-learn classifiers to select the best-performing anomaly detection model for deployment.
- Delivered insights that informed a maintenance scheduling overhaul, supporting a simulated 15–20% reduction in unplanned downtime.
- Presented findings to the engineering team, guiding preventive-maintenance prioritization across 50+ elevator units.

ACHIEVEMENTS & ACTIVITIES

- Best Performer of the Month – EON Elevators (Aug 2025)
- Core Committee Member – Cultural & Technical Club, Sapthagiri College of Engineering
- Winner – Photography, Synchron 2.0 Fest (2023) | Runner-up – Network Building, Synchron 2.0 Fest (2023)
